Final selection and fee: independent AC evaluation

Frozen historical candidate pool and R/X; 288 training + 288 validation rows; 96 new slots; original 3% rule. 12 paired background days; two laws do not double the independent denominator.
Uncapped Gaussian delivery: open-plan device violations 12/12 main, 9/12 stress; both rotations 0/12.
Aggregate results only; no load or control trajectories.
